

**Eliminate duplicate records:**

Nolij Transfer provides the most advanced matching algorithms in the industry and allows you to enhance or add to the matching process as needed.

**Load any and all data:** Nolij Transfer allows for the automated data entry of information extracted from hand-printed paper forms (e.g. recruit cards), web forms (e.g. application), text files (e.g. CommonApp), tape load or other electronic media (e.g. SAT, ACT, AP, GRE scores) and virtually any other data format (e.g. XML).

**Completely customizable:** The Nolij Transfer import is fully customizable and includes a full-featured programming interface that lets you maintain and enhance the system in-house.

**More than just data upload:** Nolij Transfer provides numerous additional features beyond simple data loading. Secure login, end user security interface and ability to create your own custom data loads are a few of these added features.

**Integrates with your existing database:** Nolij Transfer integrates directly with all popular Higher Education administrative software solutions and readily communicates with all leading databases so you can leverage your existing infrastructure and expertise.

**Fast Installation:** Nolij Transfer was designed for easy implementation. Most import sources can be installed, customized and running in a test environment in less than one week.

**Low Fixed Fee:** Whether you have 500 or 50,000 students, Nolij has the solution to fit your needs and budget. With no per-record fees, you won't have to worry about larger data files costing you more money.

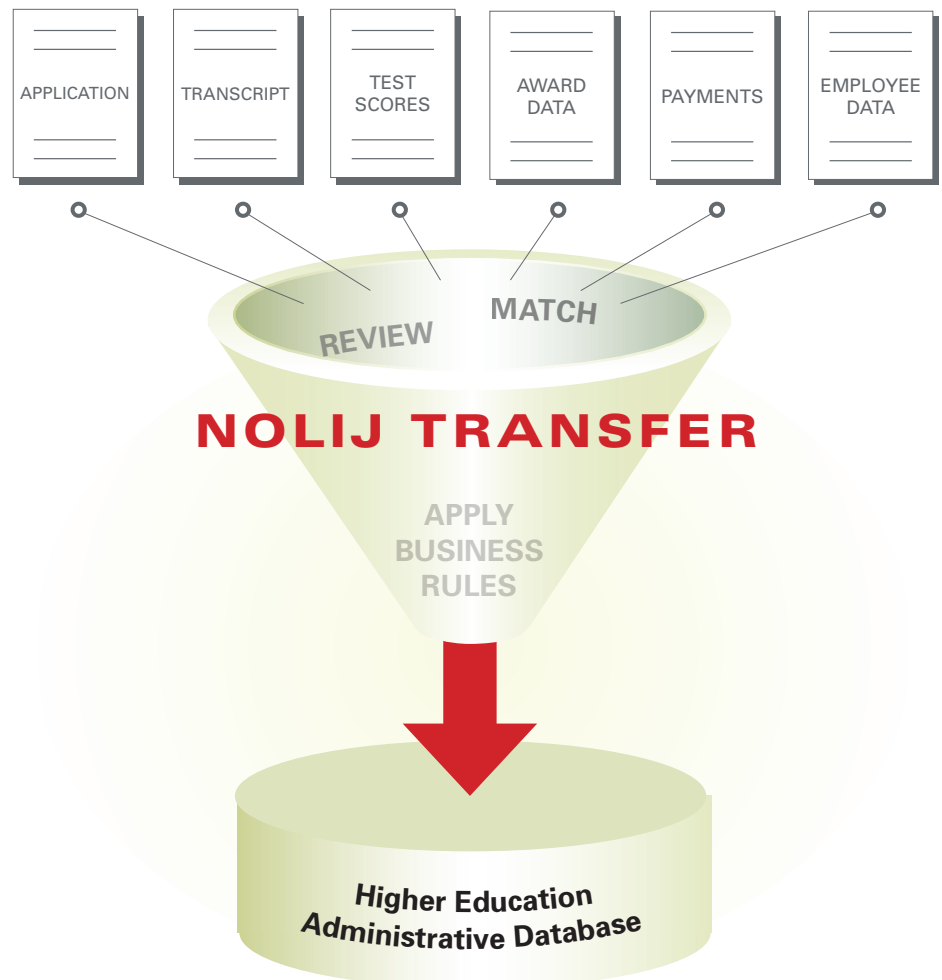

## Seize Your Data from Any Source

### The only Web-Based Data Matching, Review and Upload Solution

#### Built Exclusively for Higher Education

Nolij Transfer is the only web-based data upload solution for eliminating your data entry challenges and was crafted especially, for you, the higher education customer. Using the most advanced matching algorithms, Nolij Transfer quickly and thoroughly compares input records to your entire production database, eliminating duplicates and mismatches, and reducing time consuming data entry errors. With Nolij Transfer, you can automatically upload information collected through web forms, electronic data files, and virtually any other source and dramatically minimize staff time and training required for data entry. Nolij Transfer was created to integrate quickly and easily with your existing ERP database.

**The benefits of Nolij Transfer impact your entire campus**

**Nolij Transfer is easy to integrate, use, and customize.**

## Save Time and Money with Nolij Transfer

### ROI realized, not just envisioned:

Nolij Transfer implements quickly, integrates easily, and can be maintained fully in-house – critical factors in an enterprise wide deployment. It delivers significant ongoing savings through automation by reducing the overall cost of doing business.

### Experience payback in real-time:

Nolij Transfer dramatically reduces data entry effort and error as well as provides measurable savings by automating the upload of any data from any source directly to your existing ERP database; instantly reducing the level of effort required to match, review and upload accurate data. Nolij Transfer re-engineers your data upload process and delivers numerous benefits including:

- Reduced data entry effort and error
- Elimination of duplicates and mismatched records
- Automatic formatting and standardization of addresses
- Uses exhaustive matching algorithms and advanced nickname processing
- Reallocation of staff to higher quality student/employee/vendor/donor service and satisfaction

## What Customers are Saying

Our clients constantly testify to our software's value and fit within the Higher Education business environment.

### Western Washington University

*"Before Nolij Transfer, our admissions department needed 4 or 5 temps for 6 months each year to process our 13,000 applications – and we would still be weeks behind. Now our online applications are in the system within 24 hours. We automatically load test scores, transcripts, applications and recruit records. Plus, we can tailor it as we change our processes. Nolij Transfer is a huge time saver. I don't know what we'd do without it!"*

Margie Conway, Information Technology Specialist

### Kennesaw State University

*"Nolij Transfer has alleviated a great deal of stress associated with data entry. It has enabled us to eliminate the manual entering of applications, allowing 100-200 applications to be entered each day without backlog. In fact, we haven't experienced a data entry backlog in over three years thanks to Nolij Transfer. It has improved the accuracy and timeliness of application processing, thereby helping us to improve our relationship with students, high schools and guidance counselors. Nolij Transfer is expeditious, accurate and has a low level learning curve. It was a wonderful discovery for us."*

Joe Head, Dean of University Enrollment Services, Emeritus

### Baylor University

*"Nolij Transfer has been a great benefit to our institution. It is a very smart application which prevents duplication and keeps our database clean. Thanks to Nolij Transfer, manual data entry has been dramatically reduced and less time is spent on database cleanup."*

John Hoffman, Senior Systems Analyst

### The University of Tampa

*"Nolij Transfer has revolutionized the way we capture and codify data in Jenzabar CX and supporting systems. After importing data from 4 different application sources, Nolij Transfer cleans the data, formats it and then pushes it into our database effortlessly. We have significantly expanded our admissions funnel and decreased the response time for prospective students without an increase in staff. It has actually saved us thousands."*

Joy Kilfoyle, Director of Enrollment Innovation

### Dartmouth College

*"Nolij Transfer enabled us to import data from the Common Application effortlessly and accurately into our Banner System, freeing our staff to handle more student centric duties."*

Peter Tannin, Director of Information Systems, Dartmouth College
