SunGard Higher Education, Oracle PeopleSoft, Jenzabar, and more
- Integrates with all leading databases including:
Oracle, SQL Server, Sybase, Informix, DB2, Ingres, MySQL, and more

Seize the Data

Nolij Transfer is the premier solution for eliminating your data entry challenges and was crafted especially for you, the higher education customer. Nolij Transfer is the only 100% web-based data matching, review and upload solution available today. Using the most advanced matching algorithms, Nolij Transfer quickly and thoroughly compares input records to your entire production database, eliminating duplicates and mismatches, and reducing time consuming data entry errors. With Nolij Transfer you can automatically upload information collected through web forms, electronic data files, and virtually any other source and dramatically minimize staff time and training required for data entry. With highly configurable end-user security, it is easy to control what each user can and cannot do.

The Nolij Transfer product is intuitive, flexible and fully customizable. Nolij Transfer allows you to create custom enhancements and add to or modify the matching, review, and upload processes as needed. The system can be maintained fully in-house, without the need to involve outside consulting or development whenever changes may be required.

Worried about integration or implementation? Don't be. Nolij Transfer was created to integrate quickly and easily with your existing ERP database. Implementation is fast and worry-free as all Nolij consultants are fully trained on the technical and functional aspects of your specific ERP solution. Nolij Transfer has a low fixed annual fee, comes standard with an unlimited use license, and has absolutely no transaction quotas or per-record costs.

Find out how Nolij Transfer can dramatically reduce data entry effort and error at your institution without adding significant cost to your operation. Call us today or visit us at www.nolij.com for more information or to schedule an online demonstration of Nolij Transfer.

“ Before Nolij Transfer, our admissions department needed 4 or 5 temps for 6 months each year to process our 13,000 applications – and we would still be weeks behind. Now our online applications are in the system within 24 hours. We automatically load test scores, transcripts, applications and recruit records. Plus, we can tailor it as we change our processes. Nolij Transfer is a huge time saver. I don't know what we'd do without it! ”

Margie Conway
Information Technology Specialist
Western Washington University

Minimum System Requirements:

- Pentium 1 GHz
- 128 MB RAM
- Windows NT, 2000, XP
- Microsoft Internet Explorer 6.0 SP 1
